

In addition to expertise in **Locating & Mapping, On The Mark** offers several other innovative and cost-effective services including:

- ⊕ **Maintain The Marks** – This is an innovative and cost-effective program to help protect you from paying for damages caused by not properly maintaining stakeout marks (in adherence to Code Rule 753 law). In this program, prior to digging, we create a digital video record of your site, we measure and document marks using physical site datums, and we re-establish all missing marks per your request throughout your excavation process.
- ⊕ **Cathodic Protection** – This program utilizes a well-known technique to control the corrosion of underground metal piping by making it the cathode of an electrochemical cell. It uses sacrificial anodes and test stations strategically placed throughout your utility line.
- ⊕ **Infrastructure Management Services** – This is a comprehensive program including **Underground Locating, Marking, Mapping, Damage Protection, Cathodic Protection, Locate Underground Electric Faults, etc.** In this program On The Mark is your Property Management partner for all underground utility management.

All these programs help to protect your private residential or commercial property investment. Not only saving you thousands and tens of thousands of dollars but protecting your multi-million-dollar investment.

# Avoid Excavation Damage & Costs

## Underground Utility Locating

To locate & mark private or customer owned and maintained utilities, **On The Mark** employs non-invasive detection instrumentation, RF & GPR. No digging required. Highly trained and experienced technicians specialize in accurately locating underground utilities.

Detecting Equipment & Instruments

Using state-of-the-art detection equipment including Ground Penetrating Radar (GPR), **On The Mark** can locate:

- ⊕ Gas and Propane Pipes
- ⊕ Underground Storage Tanks
- ⊕ Water Pipes
- ⊕ Sewer Pipes
- ⊕ Irrigation and Drainage Pipes/Tanks,
- ⊕ Empty Ducts, Metal Valve Boxes,
- ⊕ Fuel Tanks, Conduits and
- ⊕ Other Buried Objects

In addition, we can detect & locate telephone lines, television/cable lines, power cables, etc.

## Mark Out & Mapping

Immediately following location completion of subsurface utilities, an **On The Mark** mapping technician collects field map drawings with measurements, or maps provided from the customer to create updated layouts. Maps are provided in .kmz, GIS, CAD, or .pdf formats. All maps include color coded utilities with symbols explaining existing structures, original on-site building size and measurements.

## Using Utility-Recognized Identification

APWA UNIFORM COLOR CODE FOR MARKING UNDERGROUND UTILITY LINES	
	WHITE - Proposed Excavation
	PINK - Temporary Survey Markings
	RED - Electric Power Lines, Cables, Conduit and Lighting Cables
	YELLOW - Gas, Oil, Steam, Petroleum or Gaseous Materials
	ORANGE - Communication, Alarm or Signal Lines, Cables or Conduit
	BLUE - Potable Water
	PURPLE - Reclaimed Water, Irrigation, and Slurry Lines
	GREEN - Sewers and Drain Lines

## Skilled & Experienced Technicians

**On The Mark** services are an asset in planning excavation, construction/engineering, property renovation, landscaping, or plumbing. All of our technicians are Northeast Gas Association (NGA) Operator Qualified and tested in the field of underground facility management. Every technician has years of experience and in-depth working knowledge of underground facilities, buried structures and supporting the safe digging regulations of "Dig Safe New York".

## Compliant with Regulations

OTM is a UDIG NY Member  
Official Private Locator
